

# DIAMOND ZEE Ring Size Guide

There are two methods below you can use to find your ring size.

Print out this page on an A4 sheet of paper.

Make sure that you have not selected 'fit to page/printable area selected' as this will make the sizing inaccurate.

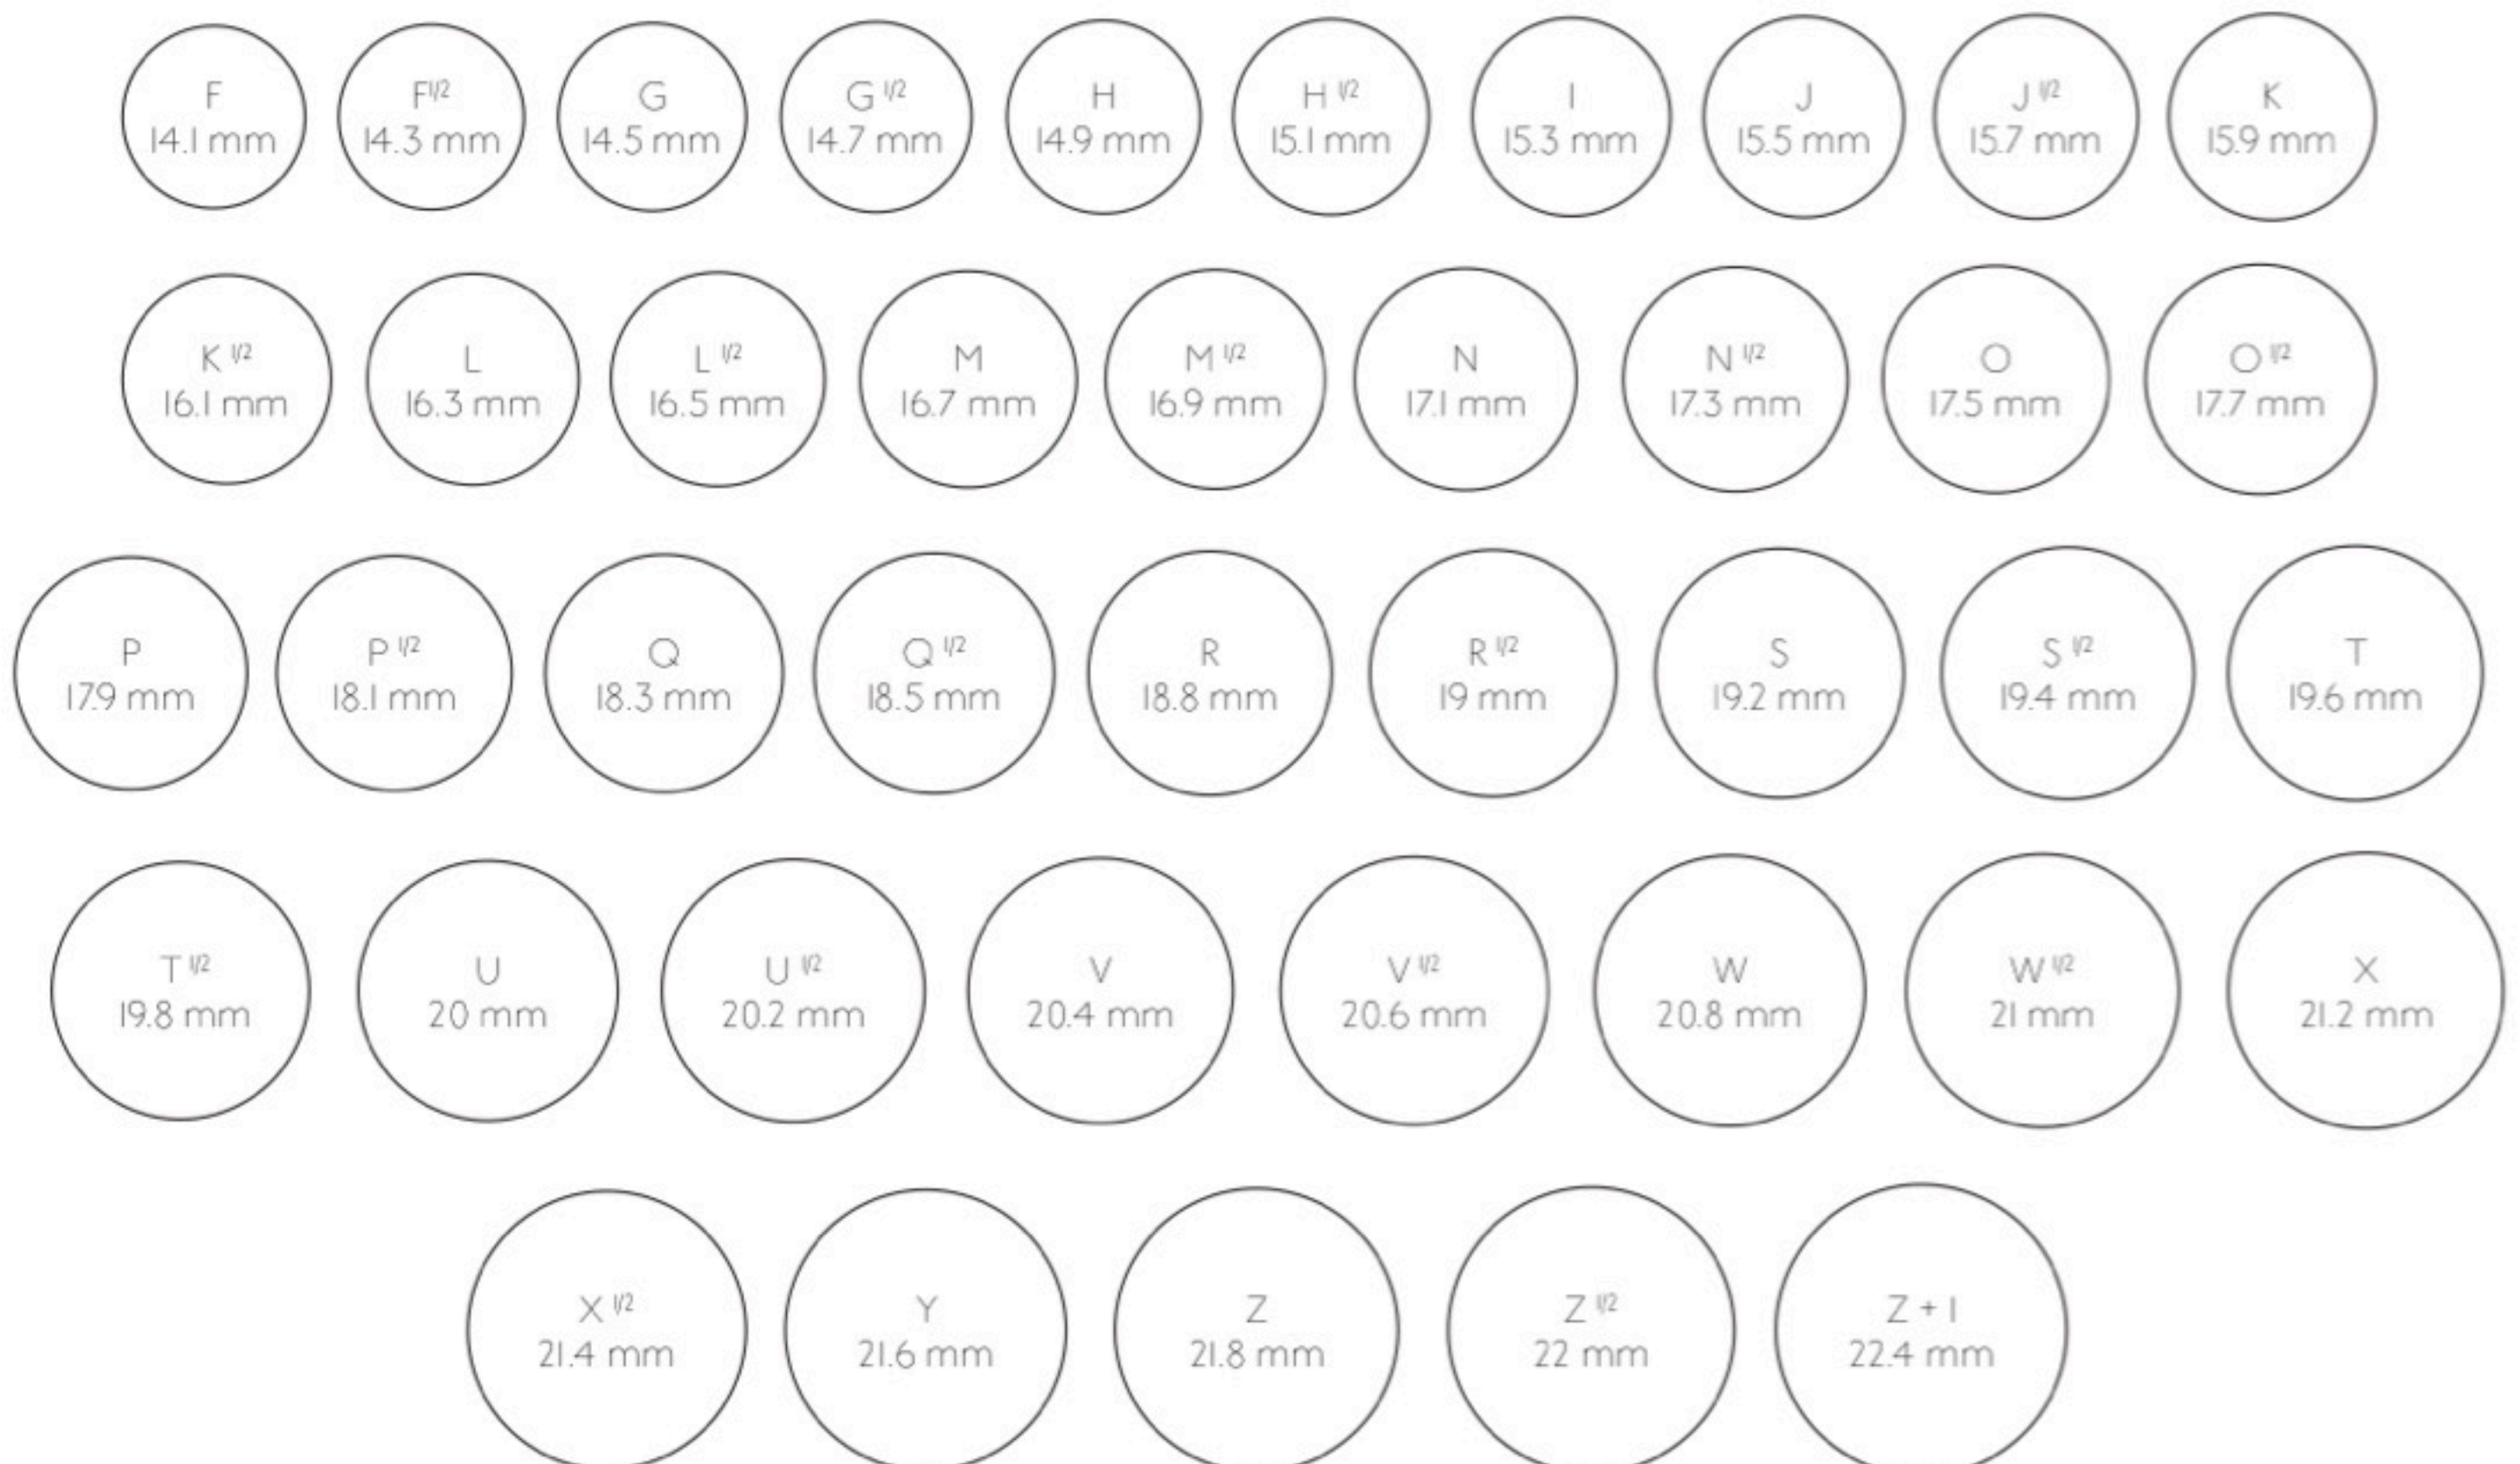

This first method allows you to measure the finger directly

1. Cut around the image of the sizer below.
  2. Cut a slot in the sizer where indicated.
  3. Wrap the sizer around the desired finger and pull the end of the sizer through the slot that you have just cut.
  4. Pull the end so it fits snug around the finger.
- The arrow will point to a letter indicating your ring size.

Or... You can find your size by measuring an existing ring

1. Lay the ring over the circles below.
2. Match the inner surface of the ring to one of the printed circles.

This is an excellent way to discretely find out a size to surprise someone.
